MOTOMAN'S AUTOSORTER™ III PROVIDES FAST, ACCURATE PRE-/POST-CLINICAL SPECIMEN PROCESSING

Dayton, Ohio — Motoman's new AutoSorter™ III is a compact, fully integrated pre- and post-analytic specimen processing instrument that is ideal for hospital and medical center laboratory environments. Designed to improve processing accuracy and relieve laboratory staff of repetitive tasks, AutoSorter III provides fast, accurate and reliable specimen sorting, centrifugation and decapping.

Like other AutoSorter platforms, AutoSorter III permits use of a wide variety of specimen tube configurations and instrument racks. It may be used as a stand-alone workcell for specimen processing, or may be connected to a track system for direct transfer of specimens to and from diagnostic instruments. It also consolidates post-analytic specimens and creates inventory files for archive consolidation.

Motoman provides automated clinical laboratory specimen processing solutions for sorting; aliquoting; decapping/recapping; thawing/mixing; centrifugation; and archive storage and retrieval -- with a range of standard platforms (AutoSorter™ I/II/III). AutoSorter solutions can be customized to develop unique work cells to meet each laboratory's unique specimen processing needs.

Motoman is the North American solutions provider of parent Yaskawa Electric Corporation, a \$3 billion global leader in automation technology. Unlike diagnostic instrument suppliers that also offer automation, Motoman's primary focus is providing world-class solutions to meet our customers' process improvement and automation challenges. Whether providing a single specimen processing workcell or a complete integrated system to solve the processing requirements of a high-volume reference laboratory, Motoman is committed to helping each customer achieve automation success. A provider of high-volume clinical laboratory specimen processing to the country's largest reference laboratories, Motoman now offers reliable, robust automation solutions for medium-volume laboratories in hospitals and medical centers.

For more information on solutions for the clinical laboratory environment or other Motoman products and services, visit our corporate web site at www.motoman.com, call 937.847.6200 or write to Motoman Inc., 805 Liberty Lane, West Carrollton, Ohio, USA 45449.
