**MOTOMAN ROBOTICS and TECH-CON AUTOMATION INC. ANNOUNCE
STRATEGIC PARTNERSHIP FOR ROBOTIC WATERJET CUTTING SOLUTIONS**

DAYTON, OH (JUNE 7, 2010) — Motoman Robotics (division of Yaskawa America, Inc.), a leading industrial robot manufacturer, announced a partnership with Tech-Con Automation Inc. (TCA) for robotic waterjet solutions. Waterjet cutting solutions are widely used for automotive trimming of headliners and other interior components. Tech-Con has extensive experience integrating the robotic and pump equipment required for this application.

TCA, based in Burlington, Ontario, Canada, is a leading industrial automation systems integrator. TCA will be responsible for the integration of waterjet cutting cells for new and existing Motoman customers in North America. In addition, TCA will handle service contracts and retrofits on all existing Motoman waterjet cutting systems within the automotive industry.

“Motoman Robotics has an extensive installed base in waterjet cutting applications using Flow pump equipment. With TCA’s co-operative agreement with Flow Corporation and our partnership with Motoman Robotics, we will bridge the three organizations to support the existing installed base in the waterjet market,” says Casey DiBattista, President of Tech-Con Automation Inc. “We will continue to increase our customer base and promote high-tech solutions for the marketplace. Tech-Con Automation Inc. has long been a Motoman Solution Partner, and we have the technical expertise to successfully execute large programs.”

“Tech-Con Automation has been integrating Motoman robots for many years,” says Roger Christian, VP-Marketing and International Groups at Motoman Robotics. “They have well-seasoned, experienced talent to excel in the robotic waterjet market, as well as the overall automation industry. Tech-Con has our complete technical support commitment to ensure that they offer the highest technology solutions to their customers. We welcome the relationship and are very excited to continue to serve this market with such a strong partner.”

ABOUT Motoman Robotics

Founded in 1989, the Motoman Robotics Division of Yaskawa America, Inc. has grown to become the second largest robotics company in the Americas with an installed based of over 30,000 units. Its products include robotic automation solutions for virtually every industry and robotic application, including arc welding, assembly, coating, dispensing, material handling, material cutting, material removal and spot welding operations. ABOUT Tech-Con Automation Inc.

Since 1995, Tech-Con Automation has been building a tradition of quality robotic systems and proven integrated solutions. Now a leading source for industrial automation solutions, TCA provides pallet-based assembly lines, material handling and robotic waterjet cutting cells to a variety of industries in North America. From machining, fabrication, mechanical and electrical services to project management and engineering, Tech-Con Automation Inc. is a one-stop source for complete automation solutions.
