Since its founding in 1915, Yaskawa has delivered breakthrough innovations to help customers increase efficiency, improve quality, boost productivity and achieve outstanding ROI.

**THE AUTOMATION ADVANTAGE**

Yaskawa Motoman makes achieving these ideals automatic, with end-to-end robotic solutions for picking, packing, palletizing and warehouse management. We deliver unmatched support for clients around the world, helping the packaging industry optimize its operations by improving:

- Quality: Achieve consistency in picking, packing and preparing for delivery
- Efficiency: Dramatically increase speed, streamline required space and reduce operational costs
- Flexibility: Leverage soft controls and the power of multiple languages (INFORM™, RSLogix™, LabVIEW™, ROS, C++)
- Scalability: Easily adapt to new opportunities by scaling up or down and shifting operations
- Performance: Depend on enduring reliability, including off-hours, holidays and for decades to come

**Proven Partners**

Our global network of experienced partners helps clients tailor automation solutions to their precise needs. Our strategy partners can configure and integrate end-to-end solutions for optimal flexibility and productivity.

**PACKAGING SOLUTIONS**

End-to-End Dedicated Solutions for Packaging Applications

Yaskawa Motoman provides game-changing benefits for packaging applications by improving:

- Quality: Achieve consistency in picking, packing, palletizing and preparing for delivery
- Efficiency: Dramatically increase speed, streamline required space and reduce operational costs
- Flexibility: Leverage soft controls and the power of multiple languages (INFORM™, RSLogix™, LabVIEW™, ROS, C++)
- Scalability: Easily adapt to new opportunities by scaling up or down and shifting operations
- Performance: Depend on enduring reliability, including off-hours, holidays and for decades to come

**Globally Converging Solutions**

A global leader in industrial robotics, Yaskawa has become synonymous with advanced technology and ground-breaking innovation. With solutions tailored for nearly every application and operations in dozens of countries, Yaskawa is proud to serve leading companies in diverse industries throughout the world.

- Over 300,000 robots, 10 million servos, and 18 million inverter drives installed
- 150+ robot models
- Offices in 28 countries
- Solutions for every industry and application
- Global network of integration partners and service providers
- Industry-leading training programs (75+ courses, on-site training)
- Ongoing contributions to workforce development and STEM-based education
- 100 years of innovation history
- Continued R&D investment for emerging markets

**Customer Satisfaction**

Yaskawa delivers unparalleled support for clients worldwide, enabling end-to-end operation and management solutions. We offer:

- 36/5 customer service and 6-hour service response
- 8-hour travel radius
- Offices in 25 countries
- Solutions for every industry and application
- Global network of integration partners and service providers
- Industry-leading training programs (75+ courses, on-site training)
- Ongoing contributions to workforce development and STEM-based education
- 100 years of innovation history
- Continued R&D investment for emerging markets

In packaging applications, everything depends on consistency and efficiency. Whether your focus is food and beverage, pharmaceuticals, consumer products or specialty items, success hinges on ensuring that goods reach the market as planned—complete, pristine and delivered with maximum quality and minimal expense.

Yaskawa Motoman makes achieving these ideals automatic, with end-to-end robotic solutions for picking, packing, palletizing and warehouse management. We deliver game-changing benefits for packaging applications by improving:

- **Quality**: Achieve consistency in picking, packing, palletizing and preparing for delivery
- **Efficiency**: Dramatically increase speed, decrease required space and reduce operational costs
- **Flexibility**: Leverage unified controls and the power of multiple languages (INFORM™, RSLogix™, LabVIEW™, ROS, C++)
- **Scalability**: Easily adapt to new opportunities and by rapidly scaling up or down and shifting operations
- **Performance**: Depend on enduring reliability, including off-hours, holidays and for decades to come

**Proven Partners**
Our global network of experienced partners helps clients tailor automation solutions to their precise needs. Our strategic partners can configure and integrate packaging solutions for optimal efficiency, productivity and ROI.
Yaskawa Motoman offers automation solutions for every stage of packaging operations. With Motoman’s robots tailored for each task and a wide range of payloads and capabilities, it’s easy to configure an ideal solution for your specific needs. Our full suite of products and technologies make integrating and managing your solution remarkably simple, easy, and cost-effective.

**Pickling, Packing, Palletizing—Perfected**

**Palletizing**
- Filling pallets easy.
- Palletizing robots make up to 800 kg, heavy-duty with payload capacities greater range of motion.

**Case Packing**
- For heavier payloads and a nimble and precise.
- Packing robots are designed with high-speed picking efficient and consistent.

**Warehouse Logistics**
- Make primary packaging 180-420 mm z-stroke
- 450-1000 mm horizontal reach;
- 6-20 kg payload, MYS-series SCARA robots

**Software and Vision**
- Tailored for each task and a wide range of payloads and capabilities, it’s easy to configure an ideal solution for your rapid, simple and cost-effective.
- With Motoman® robots certified food-grade lubricants

**Drives & Motion**
- For robot control and monitoring
- User-friendly, powerful software enhancements for quality and productivity packages on multiple lines
- Easy tracking of products or \( \text{MLX200} \)
- Enables efficient, high-speed pick scheduling with MotoPick™ for warehouse and material handling and a user-friendly interface to monitor and manage palletizing operations in real time.

**Conveyors**
- Nine product lines of conveyor systems include: (conveyors, fillers, sensors) within a single system—with no additional controllers

**End-to-End Automation**

**Picking**
- Make primary packaging affordable and scalable at high-speed picking robots designed to be durable and precise.

**Case Packing**
- Picking and other secondary operations require - 6-20 kg payload, MYS-series SCARA robots

**Palletizing**
- Palletizing with payloads capacities up to 800 kg, temporary daily handling and a user-friendly interface to monitor and manage palletizing operations in real time.

**Targets**
- Ready to explore the impact that automation can have for your specific packaging operations?

PACKAGING SOLUTIONS

In packaging applications, everything depends on consistency and efficiency. Whether your focus is food and beverage, pharmaceuticals, consumer products or specialty items, success hinges on ensuring that goods reach the market as planned—complete, pristine and delivered with maximum quality and minimal expense.

THE AUTOMATION ADVANTAGE

Yaskawa Motoman makes achieving these ideals automatic, with end-to-end robotic solutions for picking, packing, palletizing and warehouse management. Our proven expertise and commitment benefit the packaging operations by improving:

• Quality: Achieve consistency in picking, packing and preparing for delivery
• Efficiency: Dramatically increase speed, decrease required space and reduce operational costs
• Flexibility: Easily adapt to new opportunities and by readily scaling up or down and shifting operations
• Reliability: 350,000 robots and 5 million servos installed globally; 10 years or more life expectancy

Proven Partners

Our global network of experienced partners helps clients tailor automation solutions to their precise needs. Our strategic partners can configure and integrate robotic solutions for optimal efficiency, productivity and profit.

Customer Satisfaction

Yaskawa delivers unrivaled support for clients worldwide, backed by a global network of trained service and support professionals.

Global Leadership, Local Support

A global leader in industrial robotics, Yaskawa has become synonymous with advanced technology and groundbreaking innovation. With solutions tailored for nearly every application and operations in dozens of countries, Yaskawa is proud to serve leading companies in diverse industries throughout the world.

• Over 300,000 robots, 3 million servos, and 12 million inverter drives installed
• 150+ robot models
• Offices in 28 countries
• Solutions for every industry and application
• Nationwide training programs, webinars and on-site training
• Ongoing contributions to workforce development and STEM-based education
• 100 years of innovation history
• Continued R&D investment for emerging markets
